Empathy Map

This empathy map describes the HR or administrative user who imports employee data from spreadsheets into ServiceNow using Import Set Tables and Transform Maps, with validation and Coalesce to update existing records and avoid duplicates.

SAYS • I need accurate employee imports. • Update existing records correctly. • Avoid duplicate employee records.		THINKS • Spreadsheet data must map correctly. • Validation should catch errors. • Coalesce should match Employee ID.
	HR / ADMIN USER <i>(Employee Data Manager)</i>	
DOES • Prepares employee spreadsheet data. • Imports data through Import Set. • Checks transformed employee records.		FEELS • Confident when imports are accurate. • Concerned about mapping errors. • Relieved when duplicates are prevented.
