Team ID	SWTID-2026-5235
Project Name	Import Data Using Transform Maps (Spreadsheets)
Maximum Marks	2 Marks

Customer Journey Map

Map the HR/administrative user's experience stage-by-stage while importing employee spreadsheet data into ServiceNow, including actions, touchpoints, thoughts, feelings, process ownership, and improvement opportunities.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	- Collect employee details in Excel. - Prepare new and updated records. - Check required fields and Employee ID.	- Upload the spreadsheet. - Stage data in the Import Set Table. - Run the Transform Map.	- Review transformed employee data. - Verify records in Employee Test. - Check reports and dashboard results.
Touchpoint <i>What part of the service do they interact with?</i>	- Excel spreadsheet - Employee data fields - HR/admin user	- Import Set Table - Transform Map - Field mapping and Coalesce	- Employee Test table - Reports - Dashboard
Customer Thought <i>What is the customer thinking?</i>	- Is the spreadsheet complete? - Are the employee IDs correct? - Will the data import correctly?	- Are fields mapped correctly? - Will existing records be updated? - Will duplicate records be avoided?	- Were records inserted or updated correctly? - Are there any errors or duplicates? - Can I monitor the import results?

Customer Feeling <i>What is the customer feeling?</i>	- Careful - Hopeful - Concerned about errors	- Attentive - Confident - Relieved	- Satisfied - Confident - Assured
Process Ownership <i>Who is in the lead on this?</i>	HR / Admin User	ServiceNow Admin / Developer	HR / Admin + ServiceNow Admin
Opportunities <i>How can we improve this stage?</i>	- Use a standard spreadsheet template. - Validate mandatory fields before upload. - Provide a sample Excel format.	- Automate field mapping where possible. - Show import and transform status. - Flag transform errors clearly.	- Automate validation checks. - Alert users to duplicates or errors. - Monitor results through the dashboard.
