

Project Executable Files

Date	01 October 2026
Team ID	SWTID-2026-5235
Project Name	Import Data Using Transform Maps (Spreadsheets)
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	NA
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / package.json / dependency file	NA
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	NA
6	Deployed application URL (if hosted)	Not provided
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Not provided

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

[Paste or describe your folder structure here. Example:]

```

/project-root
/src    - Source code files
/tests  - Test files
/docs   - Documentation
/config - Configuration files
README.md - Setup and run instructions
requirements.txt - Python dependencies (or package.json for Node)
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not provided — ServiceNow development instance
Login Credentials (Demo)	Not provided
Platform / Hosting Provider	ServiceNow development instance
Repository Link	Not provided — ServiceNow configuration project
Demo Video Link	Not provided

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites:

[List required software, versions, and system requirements]

Step 1: [e.g., Clone the repository: `git clone <url>`]

Step 2: [e.g., Install dependencies: `pip install -r requirements.txt`] Step

3: [e.g., Configure environment: copy `.env.example` to `.env`] Step 4:

[e.g., Run database migrations: `python manage.py migrate`] Step 5:

[e.g., Start the application: `python manage.py runserver`] Step 6:

[e.g., Open browser at `http://localhost:8000`]

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	ServiceNow configuration is instance-dependent; no standalone source-code package is provided.	Run the workflow in the configured ServiceNow development instance.
2	Deployment URL, repository link, and demo credentials were not provided.	Use the project team's ServiceNow instance/access details when submitting.
3	Performance-test screenshots and measured performance values must be replaced with actual evidence.	Attach actual ServiceNow screenshots and measured results before final submission.
